

Electone® *STAGEA*® mini

Play mini!

Happy times are here.

The real joy of music lies in the joy of playing.
The freedom to experiment with colorful tones and rhythms.
Let the music inspire you, from your fingertips to your toes.
An Electone makes every day fresh and exciting.
There's no greater happiness. And it all starts with STAGEA mini.

Expand your enjoyment of music — Welcome to the world of the mini.

For the enjoyment of all — the mini, an Electone within easy reach.
The more you play it, the more you'll love it.

Musical ability will grow naturally as you play the triple keyboards.

The Electone has three keyboards, played with both hands and both feet: top keyboard for melody, bottom for accompaniment, pedalboard for bass. You'll really come to deeply understand the music as you use your whole body to play it.

Before you even learn your DoReMi you'll be playing and enjoying music.

The Wonderland Kit is packed with sounds based on animal cries and all kinds of sound effects from everyday life. Playing with these sounds, even the youngest child can enjoy the world of music.

Keyboards with a touch so light even tiny hands can play with ease.

The New Basic keyboard was designed for effortless playing, so you can concentrate on enjoying the music. These keys won't tire small children or make practice a chore.

Stylish design matches modern interiors.

The mini follows in the STAGEA tradition of clean, modern design. It will look good wherever you put it — in your living room or your child's room.

Electone® STAGEA® mini

- STAGEA series stylish design
- 245 AWM voices and 133 rhythm patterns

ELB-01 (Bench included)

Functions

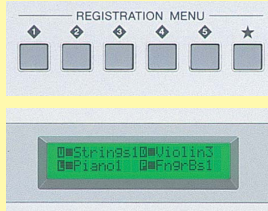

From the STAGEA family, so you know the sounds are true.

Express yourself and enjoy yourself.

The mini makes it easy to play with a vast variety of musical sounds, tones and rhythms.

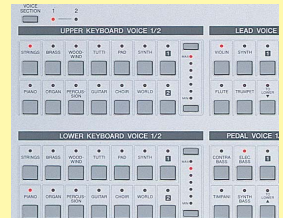

Registration menu gives instant access to the sounds you want to play.

The registration menu provides preset combinations of tones and rhythms. The mini has the same 240 registrations as the STAGEA standard model, for one button access to a multitude of styles, from pops to fusion and jazz.

The STAGEA series. For a vast range of expressive sounds.

From strings to piano to trumpet, all the mini's sounds are sampled from actual instruments. And then there are the 245 voices created by Yamaha's famed AWM system. Upper and lower keyboards and pedalboard give a total of seven possible combinations.

From nostalgic oldies but goodies to the latest pop hits.

133 authentic rhythm patterns sampled from actual drums and percussion instruments let you reproduce any genre — rock to jazz, latin to R&B. And the Wonderland Kit is sure to delight young children, as they tap the keys to summon percussion effects using sounds as varied as animals or automobiles.

Effects let you express yourself, add a personal touch.

You can personalize any selected tone by adding effects. Reverb is just the beginning: let your creativity run free with a selection of 97 effects.

Conveniently located USB device connector.

A connector for USB flash memory or other media on the lower keyboard makes it easy to save or reinstall your data.

		ELB-01 (STAGEA mini) (Bench included)
